

Amendments to the Claims

This listing of claims replaces all prior versions, and listings, of claims in the above-identified application:

1-14. (Canceled)

15. **(New)** A composition comprising at least the two components Z1 and Z2, wherein component Z1 comprises at least one polyaddition product or at least one polycondensation product having on average 2 aziridino groups or more and a molecular weight of at least 1000, and

wherein component Z2 comprises at least one compound having 1 aziridino group, at least one compound according to component Z2 differing, in its chemical make-up, from at least one compound according to component Z1 in at least one further feature other than the number of the aziridino groups, the difference from component Z1 comprising at least one or two or more of the following further features:

- i) number average of the molecular weight,
- ii) weight average of the molecular weight,
- iii) polydispersity,
- iv) composition of the polymer backbone, and
- v) end groups.

16. **(New)** A composition according to claim 15, wherein component Z1 comprises at least one polymer selected from the group consisting of polyethers, polyesters, polyurethanes, and polydimethylsiloxanes.

17. **(New)** A composition according to claim 15, wherein component Z1 comprises a polyether having at least a proportion of tetrahydrofuran units.

18. **(New)** A composition according to claim 15, wherein component Z2 comprises a compound selected from the group consisting of polyethers, polyesters, polyurethanes, and polydimethylsiloxanes.
19. **(New)** A composition according to claim 15, wherein component Z2 comprises a compound having a molecular weight of 300 or more.
20. **(New)** A composition according to claim 15, further comprising an additive or a mixture of two or more additives.
21. **(New)** A process for the preparation of a composition, comprising mixing two components Z1 and Z2 together,
wherein component Z1 comprises at least one polyaddition product or at least one polycondensation product having on average 2 aziridino groups or more and a molecular weight of at least 1000, and
wherein component Z2 comprises at least one compound having 1 aziridino group, and at least one compound according to component Z2 differing, in its chemical make-up, from at least one compound according to component Z1 in at least one further feature other than the number of the aziridino groups, the difference from component Z1 comprising at least one or two or more of the following further features:
i) number average of the molecular weight,
ii) weight average of the molecular weight,
iii) polydispersity,
iv) composition of the polymer backbone, and
v) end groups.
22. **(New)** A dental material comprising at least one basic component B and at least one catalyst component K, wherein basic component B comprises at least one composition according

to claim 15, and wherein catalyst component K comprises at least one catalyst for the cross-linking of at least part of basic component B.

23. **(New)** A dental material according to claim 22, wherein after mixing of basic component B and catalyst component K at room temperature, the dental material has within a period of 20 minutes or less, a Shore A hardness of at least 80% of the value of Shore A hardness reached after 24 hours.

24. **(New)** A method of using a dental material according to claim 22 to form coatings, impression materials, seals, or dental moulding materials.

25. **(New)** A method of accelerating the setting rate of a dental material according to claim 22, comprising using a compound having 1 aziridino group.

26. **(New)** A kit for producing dental materials, comprising basic component B and at least one catalyst component K comprising a catalyst for the cross-linking of at least part of basic component B, wherein basic component B comprises at least one component according to claim 15, and wherein the components B and K are present separated from one another.

27. **(New)** A container or mixing device comprising a dental material according to claim 22.
